PROFESSIONAL SUMMARY

Full-Stack Developer with around two years of hands-on experience building AI-powered SaaS platforms, CRM systems, and admin dashboards end to end. Strong across React.js, Next.js, Node.js, and Laravel/PHP with MySQL, REST APIs, authentication, and role-based access control. Has contributed to 10+ production projects, taking applications from concept through to deployment.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Material UI, Bootstrap
Backend	PHP, Laravel, Node.js, Express, REST APIs, Authentication, Role-Based Access Control (RBAC)
Database	MySQL, Prisma, SQL Server, Firebase
Tools & AI	Git, GitHub, Ubuntu/VPS Deployment, Puppeteer, PDF Generation, Stripe, Razorpay, Google Gemini API, Prompt Engineering

WORK EXPERIENCE

Technicul Cloud LLP — Mumbai, MH

Full-Stack Developer

Oct 2024 – Present

Developer Trainee (final-year training & internship)

Apr 2024 – Sep 2024

- Promoted from Developer Trainee to Full-Stack Developer after delivering production SaaS, CRM, and e-commerce projects end to end.
- Contributed to **10+ internal and client projects** across the stack — React/Next.js frontends and Laravel/PHP & Node.js/Express backends — spanning AI API integration, authentication and RBAC, payment gateways, database design, and production deployment on Ubuntu/VPS.

PROJECTS

ResumeSprint — AI Resume Builder & ATS Optimization SaaS

resumesprint.io

Next.js / React, TypeScript, Node.js/Express, Prisma, MySQL, Stripe, Google Gemini, Puppeteer

- Architected a production SaaS as **three independently deployed apps** (Next.js user app, admin panel, stateless Express REST API) with a modular 5-layer TypeScript backend (routes-controller-service-repository) across 8 domains and ~60 endpoints, on a 12-model Prisma/MySQL schema.
- Engineered email/password + **Google OAuth 2.0** auth with CSRF-protected state and DB-backed httpOnly session tokens, RBAC across 3 roles, and end-to-end **Stripe** billing with HMAC signature-verified webhooks and a StripeEvent idempotency table.
- Built an AI pipeline on **Google Gemini** (resume parsing, ATS scanning, improvement, translation, cover letters) with strict JSON-schema prompting and plan-based model tiering, plus a @dnd-kit drag-and-drop builder with Puppeteer PDF export.

Technicul Workspace CRM

workspace.technicul.com

React, TypeScript, MUI, Vite — Laravel REST API, Sanctum

- Led the **React + TypeScript SPA** for an internal agency operations platform (projects, sprints, kanban, employees, financials), building role-segmented module trees for SuperAdmin, Sales Executive, and Employee personas over a shared axios/SWR service layer.
- Implemented rich domain UIs — drag-and-drop kanban (dnd-kit), Gantt and FullCalendar timelines, TipTap rich-text, and MUI-X/ ApexCharts dashboards — against a Sanctum-authenticated Laravel API (24 models, 49 migrations).

EudoraVanity — E-Commerce Platform (Beauty & Cosmetics)

eudoravanity.com

Laravel, PHP, MySQL, Spatie Permission, Razorpay, Shipmozo, Tailwind, Alpine.js

- Architected the complete backend of a domain-segmented Laravel platform (33 models, 50 migrations) with fine-grained Spatie RBAC driven by a seeder mapping 30 controller-scoped permission groups, plus a storefront, admin panel, and OTP-authenticated mobile REST API.
- Integrated **Razorpay** with server-side order creation, idempotent verification, and a transactional checkout that atomically updates orders, decrements per-variant stock, and clears the cart — backed by scheduled reconciliation jobs and Shipmozo shipping via a dedicated service layer.

Gosher Alliance — Construction & Project Operations Platform

Laravel, PHP, MySQL, Spatie Permission

- Built a Laravel admin platform centralizing inventory, attendance, documents, site tasks, and role-based user management for construction project operations.
- Designed a **Dynamic Database module** letting admins define custom modules, fields, and records at runtime — auto-generating forms, validation, and storage with no new code per module.

Oura Salon Admin Panel

oura.technicul.com

Laravel, PHP, MySQL, Spatie Permission, Yajra DataTables, dompdf

- Built a multi-store salon POS/billing panel (20 models, 12 controllers, ~11 modules) with a **transactional order-pricing engine** computing per-line SGST/CGST, consumable membership benefits, and bill-level offers/discounts, hybrid Spatie/custom RBAC with per-store scoping, and immutable dompdf invoices.

EDUCATION

B.Tech, Computer Science & Engineering — Sandip University, Nashik

2022 – 2025 | GPA 7.29/10

Diploma in Computer Technology — Amrutvahini Polytechnic, Sangamner

2018 – 2021 | 76.23%

Languages: English, Hindi, Marathi | **Strengths:** Problem Solving, Quick Learning
